**Net Wt:** 10.15 lbs.

**Our Original Logs® are packed with premium ingredients; all wrapped in a crispy wonton wrapper. Hot and ready in minutes, perfect for snacking, appetizers, or game days!**

# GREAT FOR ANY OCCASION

## FREQUENTLY ASKED QUESTIONS

**Q: What are the recommended cooking instructions?**

**A:** Deep fryer or any rapid cooking oven (Turbochef, Merrychef, etc ...). All products should be cooked thoroughly to achieve an internal temperature of 165 °

**Q: What are the hold times of product once cooked?**

**A:** Between 2-4 hours of hold time. To protect product integrity, it is ideal to keep hold time under 2 hours as the eggroll shell will start to become soft.

**Q: What is the shelf life of the product once slacked?**

**A:** 7 Days

**Q: What product name should the items be sold as?**

**A:** We recommended marketing the products as eggrolls (ex. Pizza Eggroll, Apple Pie Eggroll, etc.).

**Q: What marketing materials do you offer?**

**A:** Heat resistance menu clings, product tags, table tents, and parchments sleeves are available.

## TIPS:

Since most customers will not want to adjust oil temps for individual products, our items can be cooked in lower or higher oil temps by increasing or decreasing the cook times accordingly.

Add 1 minute of cook time for each 25°F (Fahrenheit) reduction in oil temp and reduce 1 minute of cook time for each 25°F increase in oil temp (vs. 350°F).

Our Original Pizza Logs® are the most versatile; they can be overcooked and are not as prone to blow outs.

The Buffalo Chicken, Taco, and Breakfast Logs will typically be on the higher end of the cook times and may require additional time in the fryer (5-7 minutes).

Dessert Logs are the most sensitive product and should be pulled out of the fryer at 4 minutes, or if blistering starts.

## COOKING METHOD

| Cooking Method | Temp | Frozen  | Refrigerated |
|----------------|------|---------|--------------|
|                | (F°) | Minutes | Minutes      |
| Conventional   | 400  | 12-14   | 7-10         |
| Convection     | 375  | 10-12   | 7-9          |
| Air Fry        | 375  | 9-11    | 4-6          |
| Deep Fry       | 350  | 4-5     | 3-5          |

All of our ingredients enter our facility fully cooked, so there is no food safety concern when discussing hold times.

**NOTE:**

Dry heat is preferred to wet heat (heat lamps vs. chaffing).
